

UNITED STATES DISTRICT COURT

UNITED STATES OF AMERICA

v.

Case No. 16-20222-1

RONALD MILLER

HONORABLE ARTHUR J. TARNOW

Honorable Arthur J. Tarnow
Theodore Levin US Courthouse
231 W. Lafayette Blvd. Room 124
Detroit, Michigan 48226

March 22, 2020

Judge Tarnow,

In Reference to Case #16-20222-1, Ronald Miller Inmate #54561-039

We the family of Ronald Miller, inmate #54561-039 at Butner Federal Correctional Complex
In North Carolina, are pleading for his immediate release based on the facts as follows:

Ronald Miller's health condition is chronic and his health condition was well documented
as Chronic, due to his heart condition and Cirrhosis of the Liver/Liver Cancer which was diagnosed
by his primary care doctor before his sentencing and incarceration.

Based on the facts as we know to date about the COVID 19 Virus and the way it is
more easily spread to others, the medical experts estimate that Covid 19 is 20 times more infectious
than any other known Corona Virus..

Based on the statistics as of to date, the elderly ages 70's and over with existing health conditions are More at
risk to this virus which can prove deadly if contracted. Ronald will soon be 70 this year and has Chronic health
conditions.

Another known fact that the prisons as they exist today are overly crowded which may contribute
For them being a breeding ground for various diseases. I spoke with
Ronnie today and he told me that they are still back to back with prisoners, The guards and medical
team are doing their best, however with the crowded conditions, and the cleaning needed Ito
help keep this virus from spreading, Ronald feels almost hopeless and feels he and others may become certain
casualties. In others words, he feels doomed.

Ronald's case is well documented regarding his Chroni c Health condition with Representative Debra Stabenow
of Michigan. Our family has consistently written the Senator's staffers and they informed us To do
Administrative Remedies which deals directly with the Warden at Butner. Each time our family Has raised these
concerns, the Warden has rejected or denied these remedies. Additionally, we have reached out in the past to
you also, to make you aware of Ronald's health condition since you are the sentencing Judge.

Please reconsider and review Ronald Millers case and we will fill out the petition needed along with this request
to bring him home.

Sincerely, _____

The Family and Loved Ones of Ronald Miller
